

CLAIMS

1. A concentrate comprising:
 - a) polybutene-1;
 - b) polypropylene;
 - c) up to 60% by weight of one or more additives.
2. A concentrate according to claim 1 comprising (percentages by weight):
 - A) from 40% to 95%, preferably from 50% to 95%, in particular from 60% to 80% of a composition comprising, relative to the total weight of A):
 - 1) from 10% to 35%, preferably from 25% to 35%, more preferably from 30% to 35% of polybutene-1;
 - 2) from 90% to 65%, preferably from 75% to 65%, more preferably from 70% to 65% of polypropylene;
 - B) from 5% to 60%, preferably from 5% to 50%, in particular from 20% to 40% of one or more additives.
3. A concentrate according to claim 1 wherein the polybutene-1 is a linear, semicrystalline and highly isotactic homopolymer.
4. A concentrate according to claim 1 wherein the polypropylene is isotactic polypropylene, having an index of isotacticity greater than or equal to 90.
5. Use of the concentrate as in the preceding claims for the dispersion of additives in polyolefins.
6. Polyolefinic articles prepared by blending polyolefins with the concentrate according to the preceding claims, followed by processing.
7. Coloured polypropylene fibres prepared by blending polyolefins with the concentrate according to the preceding claims, followed by spinning.
8. A polyolefinic composition for the preparation of concentrates of additives, comprising (percentages by weight):
 - a) from more than 10% to 35% of polybutene-1, preferably from 25% to 35%, more preferably from 30% to 35%;
 - b) from less than 90% to 65% of polypropylene, preferably from 75% to 65%, more preferably from 70% to 65%.
